

International Mass Fatalities Center (IMFC)

“Where Preparedness Meets Reality”

IMFC will prepare your agency to respond to a mass fatalities incident during a catastrophic event. IMFC is a 501(c)(3) (non-profit) organization that offers a complete and comprehensive mass fatalities incident management program that includes Assessment, Planning, Training, and Exercises.

International Mass Fatalities Center (IMFC) will provide experienced subject matter experts for *Customized Incident Response Planning, Training, and Exercises* in relation to a catastrophic event resulting in mass fatalities. IMFC provides an already completed plan that is National Incident Management System (NIMS) and Incident Command System (ICS) compliant, as well as following Homeland Security Exercise and Evaluation Program (HSEEP) guidelines. Our organization will tailor our services to your agency's specific location and needs, so that your management team can effectively work together when a disaster strikes.

With over *150 years* of collective experience, IMFC's consultants are experts in the fields of mortuary affairs, medical examiners, emergency management, law enforcement, disaster mental health, military, social services, public health, and disaster responses who have been assembled to provide subject matter consultation and instruction.

IMFC will customize planning, training, and exercises in the following areas:

- Command and Organizational Structures
- Disaster Site Management
- Morgue Site Operations
- Family Assistance Center
- Staff Processing Center
- Policies and Procedures
- Public Relations Guidance
- Critical Incident Stress Management
- Hazardous Materials Handling/Containment

IMFC helps to prepare and support a mass fatalities incident by offering a multifaceted and comprehensive program for the following agencies:

- Emergency Management
- Disaster Response Teams
- Healthcare Professionals
- Mental Health Professionals
- Law Enforcement
- Military Personnel
- Firefighters
- Public Health Workers
- Industry and Government Representatives
- Media Management
- Funeral Service Professionals
- Clergy and Spiritual Care Providers

The International Mass Fatalities Center provides resources to better equip agencies to independently manage a mass fatalities response from onset through recovery by offering a multifaceted, comprehensive, and sustainable support program of Assessment, Planning, Training, and Exercises.

IMFC provides experienced instructors able to clearly convey disaster response procedures and techniques. Our professionals employ past experiences, current knowledge, and federal guidelines to better prepare your teams for an effective response. IMFC will customize training to the specific format that accommodates your agency's unique needs, as well as provide online courses at no cost to your organization.

IMFC will better prepare your agency for attainment of goals and objectives by providing the following:

- A customized operational plan and training that have been researched and developed
- Subject matter experts that have demonstrated skills and experience
- Capabilities to support and work collaboratively with agency personnel
- Cost effectiveness while maintaining a qualitative approach

IMFC's all-hazards approach will help your agency to respond to a mass fatalities incident resulting from the following:

- Natural Disasters
- Transportation Accidents
- Acts of Terrorism
- Pandemics
- Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE)

Why IMFC?

- IMFC's plans and procedures are proven, tested, and recognized throughout Homeland Security and Public Health agencies.
- IMFC's assessment, planning, training, and exercises meet federal guidelines to include HSEEP, NIMS, and ICS.
- IMFC provides specialized trainings on a variety of topics that are specific to mass fatalities.
- IMFC uses an all-hazards approach for assessment and planning.

Count on IMFC for 150 years of collective expertise.
